/*****
*   RELEASE 1.02 Build 14
*****/
Release Date   : 2010 May 20
New Features   : - M-Audio X-session Pro midimap
Solved Bugs    : - Global Playback were turned on at startup
Limitations    : - Ubuntu: no MIDI devices

/*****
*   RELEASE 1.02 Build 12
*****/
Release Date   : 2010 May 17
New Features   : - Hungarian language
                - The selected Playback Bank is now stored in the options file.
Solved Bugs    : - Double-click on playback-button indicator could crash the software
                - Programmed Playback started with 100% intensity
                - UTF-8 support for language files
Limitations    : - Ubuntu: no MIDI devices

/*****
*   RELEASE 1.02 Build 11
*****/
Release Date   : 2010 May 12
New Features   : - Icon iControl midimap
Solved Bugs    : - Macro parameter could send out wrong dmx value
                - Playback buttons would be triggered when typing in patch menu
                - BCF-2000 'Flying fader' bug repaired
Limitations    : - Ubuntu: no MIDI devices

/*****
*   RELEASE 1.02 Build 10
*****/
Release Date   : 2010 May 3
New Features   : - MIDI clock controls the BPM
Solved Bugs    : - Selecting multiple cues in the cuelist edit screen could crash
Limitations    : - Ubuntu: no MIDI devices

/*****
*   RELEASE 1.02 Build 7
*****/
Release Date   : 2010 April 17
New Features   : - Novation Launchpad midimap
                - MIDI feedback messages expanded
                - Elation Midicon midimap improved
                - Korg nanoPAD corrected
Solved Bugs    : - Control Tempo via Midi did not work properly
                - Incorrect default value (white) for ColourRGB parameter
                - iPhone remote control had 10 playback button instead of 8
Limitations    : - Ubuntu: no MIDI devices

/*****
*   RELEASE 1.02 Build 6
*****/
Release Date   : 2010 April 13
New Features   : - Programmer view now features separate RGB and CMY control
                - Programmer view now features Amber and White control
                - Personality files now support 16 bit RGB and CMY
                - dimmer & gobo now cooperate when on same channel (eg. Futurelight D-200)
                - Copy/Paste programmer content between fixtures in main view
                - Load button for loading a active cue back into the programmer
                - Record onto an active playback will popup choice (insert-replace-merge)

```

- Playback faderstart now also works on flash button
- Patch view has replace button to change fixture type, keeps cuelist info
- USB communication on Ubuntu Linux

Solved Bugs : - Prism value was not shown correctly in Cue editor

- Removing a target from a cuelist could crash the application
- Playback fader could lag when assigned to a large cuelist
- Global playback buttons did not always work properly

Limitations : - Ubuntu: no MIDI devices

/*****

* RELEASE 1.02 Build 4

*****/

Release Date : 2010 March 19

New Features : - Framing attribute group in programmer

- Rotation attribute for gobo wheel 1, 2, & 3 in programmer

Solved Bugs : - Indicate playback button active on midi units did not work

- chases could skip cues

- using 'track' function could crash the software

Limitations : - Ubuntu: no MIDI devices

- Ubuntu: no USB communication

/*****

* RELEASE 1.01 Build 17

*****/

Release Date : 2010 March 9

New Features : - click on clock to switch from 12h and 24h mode

- Playback faderstart

- Stacklist will save Cuelists' intensity levels

Solved Bugs : - Chase could keep sending out values after it was released

Limitations : - Ubuntu: no MIDI devices

- Ubuntu: no USB communication

/*****

* RELEASE 1.01 Build 16

*****/

Release Date : 2010 March 1

New Features : - Windows 64 bit device driver for the CueCable

Solved Bugs : - Generic midimap contained faults

- Playback button assignments were sometimes not saved

- Tascam US-2400 midimap improved

- Korg Nano Kontrol go buttons did not work

- BPM counter showed incorrect value

- Tempo Break function did not work correctly

Limitations : - Ubuntu: no MIDI devices

- Ubuntu: no USB communication

/*****

* RELEASE 1.01 Build 10

*****/

Release Date : 2010 February 9

New Features : - Drag to select fixtures in main view

- Change address of multiple fixtures in Patch menu

- Rename multiple groups

- fine control of faders (SHIFT+mouse wheel)

- 'Blinder' global button restored

- optimized for speed

- 'Generic' midimap

- 'Elation' midimap improved

Solved Bugs : - Parsing of personality file modes with too many subs

- Changing non-existent values in a cue

- belts controls sometimes did not show colours/gobos/etc

- Gobo function did not work properly

- Patch view could crash

- GUI layout bug on 1366x768 screen resolution

- Blackout on shutter-only fixtures (without dimmer)

Limitations : - Ubuntu: no MIDI devices

- Ubuntu: no USB communication

- Ubuntu: no sound

- Windows: no support for 64bit

```

/*****
*   RELEASE 1.01 Build 3
*****/
Release Date : 2010 January 13
New Features : - Italian language
               - American language
               - Set BPM manually by mouse wheel on BPM display, or click and drag away
               - Clock
               - Stacks
               - Playback indicators improved
               - (multiple) cell selection in 'Edit Cuelist' view
               - Fixture limit increased (24 -> 48)
               - Programming now indicates current parameter values (obsoletes list view)
               - Rename multiple fixtures
               - Generic midimap to access all playbacks
Solved Bugs  : - Copy/Paste cuelists fixed
               - Undo remove cuelists fixed
               - Gobos in sub-fixtures
               - Position in sub-fixtures
               - Flash on playback set intensity to 100%
               - Programmer had no priority on HTP attributes
Limitations  : - Ubuntu: no MIDI devices
               - Ubuntu: no USB communication
               - Ubuntu: no sound
               - Windows: no support for 64bit

```

```

/*****
*   RELEASE 1.00 Build 9
*****/
Release Date : 2009 November 17
New Features : - 'global' timings removed from edit cuelist dialog
               - Labels can be set per cue
Solved Bugs  : - Shape dialog in programmer did not always apply changes
Limitations  : - Ubuntu: no MIDI devices
               - Ubuntu: no USB communication
               - Ubuntu: no sound

```

```

/*****
*   RELEASE 1.00 Build 7
*****/
Release Date : 2009 November 6
New Features : - 'Release' button
               - 'Release' button in Remote Control
               - Options: Art-Net subnet/universe now zero-based
               - Programmer: disabled faders are grayed out
               - Programmer: shape dialog now also has speed and phaseshift settings
               - New MIDI device supported: M Audio UC-33
               - New MIDI device supported: Novation Nocturn
Solved Bugs  : - Mac Os: newly plugged in CueCable sometime did no send DMX values
               - Cue menu: Cue 'properties' dialog did not apply changes correctly
Limitations  : - Ubuntu: no MIDI devices
               - Ubuntu: no USB communication
               - Ubuntu: no sound

```

```

/*****
*   RELEASE 1.00 Build 3
*****/
Release Date : 2009 October 12
New Features : - double click on Fixture window will select its dubs
Solved Bugs  : - Options: Hardware page sometimes showed warning message unnecessarily
               - Cuelux could crash at 0h00 time
               - The step duration of a Cuelist set to chase, containing non-fading
                 attributes was influenced by the attack level
Limitations  : - Ubuntu: no MIDI devices
               - Ubuntu: no USB communication
               - Ubuntu: no sound

```

```

/*****

```

* RELEASE 1.00 Build 2
*****/

Release Date : 2009 October 8
New Features : -
Solved Bugs : - Cuelist fading on position attribute now only uses 'fade in' timing
- screen arrangement was incorrect at full screen on 1280x960 resolution
- Paste multiple fixtures in patch is now a single action re. undo
- Random shape movement was irregular
- Parsed personality files with >10 subs (not supported by Cuelux)
- mult selection in 'add to group' dialog
- Edit IP dialog
- Select 4 moving lights, set pos. in programmer, sometimes only 1 moved
- On Mac OS could crash on CueCable removal
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****

* RELEASE 0.38 Build 1 Beta
*****/

Release Date : 2009 September 25
New Features : -
Solved Bugs : - language settings was not saved properly
- dmx monitor did not show values when opened for first time
- gobo scroll could not always be disabled
- 'J' button did not work on the on-screen keyboard (in small screen res.)
- disk menu: load show file could mix up fixture views
- disk menu: load show file could crash
- long fixture labels could fall outside of fixture view's caption bar
- Cue Editor: multi-select improved
- Cue Generator: hi/lo value faders were not working properly
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****

* RELEASE 0.36 Build 1 Beta
*****/

Release Date : 2009 September 9
New Features : -
Solved Bugs : - bug with Undo in patch view corrected
- Barrel/Flower attribute was sometimes disabled in sub-fixtures
- 'Change Fixture' dialog cosmetic bug concerning OK button
- multi-select improved in various menus
- Disk menu: file was not refreshed after a 'save as'
- Add fixture in Patch menu, then go to main view, press 'undo' would crash
- Gobo wheels in both fixture and sub-fixture did not work correctly
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****

* RELEASE 0.35 Build 1 Beta
*****/

Release Date : 2009 August 25
New Features : -
Solved Bugs : - Timeout on connecting to SyncServer to prevent long waits at startup
- Midi communication was broken (in most of the cases)
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****

* RELEASE 0.34 Build 1 Beta
*****/

Release Date : 2009 August 19
New Features : - undo/redo function improved (now also works on programmer window)
- SyncServer now also updates colour files
Solved Bugs : -

Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****
* RELEASE 0.33 Build 1 Beta
*****/

Release Date : 2009 August 12
New Features : - selection of cuelists and groups improved in menus
- midimaps moved to user dir for better access on mac os x and vista
- search via keyboard improved in 'add' dialog of the 'patch' menu
- fixture selection behaviour improved
- Cuelist editor now adds new cue after selected cue
- midimaps and languages files are automatically updated by 'SyncServer'
Solved Bugs : - some personalities wrongly enabled the CTC control in the programmer
- virtual faders had a little cosmetic bug (painted outside of the area)
- playback indicator could paint labels outside of area
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****
* RELEASE 0.32 Build 1 Beta
*****/

Release Date : 2009 July 2
New Features : - 'grid' view optimized for speed (specially for position and gobo changes)
- WSVGA (1024x600) screen resolution supported for Netbooks
Solved Bugs : - Could crash when clearing a cuelist via 'delete' button on the playback
while the cuelist was opened in the edit screen in the cue menu.
- Frost control in programmer display did not work properly.
- Dimmer attribute wasn't always parsed correctly from personality file
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****
* RELEASE 0.31 Build 4 Beta
*****/

Release Date : 2009 June 25
New Features : - 'Generator' wizard in 'cue' menu
- Deselecting group members improved
- Tascam midimap improved
- Iris level reversed (0% iris now means full open beam)
- 'Fine' tune button for pan/tilt control in Programmer display
- Personality files are now stored in \Users\ folder
- link in 'check updates' message to go straight to the download webpage
Solved Bugs : - CTC did not work properly
- BPM measurement was not accurate
- Cuelist set as chase, could show a 'black' step before looping to start
- Bug with accessing playback buttons in page 2 or higher via MIDI
- Bug in programmer display's pan/tilt control
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****
* RELEASE 0.30 Build 1 Beta
*****/

Release Date : 2009 June 12
New Features : - Patch: change a fixture's model/mode by double clicking in the list
- 'Work' midimap
Solved Bugs : - Joystick did not work properly
- running on 16bit colour resolution did result in painting problems
- Access violation fixed in 'cue' menu
- MacOS+Ubuntu: now shows local ip address in 'remote' options
- Ubuntu: Gobo images were missing
Limitations : - Ubuntu: no MIDI devices
- Ubuntu: no USB communication
- Ubuntu: no sound

/*****
* RELEASE 0.29 Build 1 Beta
*****/

Release Date : 2009 June 4
New Features : - German language complete
Solved Bugs : - Playback indicator did not always refresh correctly after restoring
 cuelist
Limitations : - Ubuntu: no MIDI devices
 - Ubuntu: no USB communication
 - Ubuntu: no sound
 - Ubuntu: Gobo images missing

/*****
* RELEASE 0.28 Build 1 Beta
*****/

Release Date : 2009 May 29
New Features : - Korg midi-map improved
 - 'Allen & Heath' midi-map
 - BPM display
 - 'Break' button for freeing chases
Solved Bugs : - Mac Os: on a MacBook (1280x800) going to 1280x1024 resolution and then
 going to full-screen mode would result in a crash
 - When selecting Full-screen mode during software execution, application kept
 its current resolution and stretched it to full-screen, rather than
 using the system's native resolution.
 - Programmer: 'clear' button still did not work properly
Limitations : - Ubuntu: no MIDI devices
 - Ubuntu: no USB communication
 - Ubuntu: no sound
 - Ubuntu: Gobo images missing

/*****
* RELEASE 0.27 Build 1 Beta
*****/

Release Date : 2009 May 20
New Features : - cuelist tempo divider finished
 - Programmer: indicates varying values in a multiple selection
 - Syses dump files included in install directory ("\\syses")
Solved Bugs : - Programmer: 'Barrel' fader was never enabled
 - Programmer: 'StandAlone' did not switch off
 - Programmer: 'Macro' belt did not indicate selection
 - Programmer: 'clear' button did not work properly
Limitations : - Ubuntu: no MIDI devices
 - Ubuntu: no USB communication
 - Ubuntu: no sound
 - Ubuntu: Gobo images missing

/*****
* RELEASE 0.26 Build 1 Beta
*****/

Release Date : 2009 May 11
New Features : - Programmer display improved. 'Knock out' replaced by 'clear'.
 'Knock out' now via 'Delete' button.
 - 'Fanning' dialog in programmer
 - MIDI devices now change internal bank setting
Solved Bugs : - Prism rotation channel could have incorrect offset
 - disk menu save as function didn't always work properly
 - Pan/Tilt fades in cuelists did not move fluently
Limitations : - cuelist tempo divider doesn't work yet
 - no MIDI devices on Ubuntu
 - no USB communication on Ubuntu
 - no sound on Ubuntu
 - Gobo images missing on Ubuntu

/*****
* RELEASE 0.25 Build 1 Beta
*****/

Release Date : 2009 May 5

New Features : - Optimized for speed
- Linux release (Ubuntu >=8.04)
Solved Bugs : - MIDI LED did not work properly
- disk menu finished
- USB communication bug on Mac OS X fixed
- fixture icon for switchpacks was missing
Limitations : - cuelist tempo divider doesn't work yet
- no MIDI devices on Ubuntu
- no USB communication on Ubuntu
- Gobo images missing on Ubuntu

/*****
* RELEASE 0.23 Build 1 Beta
*****/

Release Date : 2009 April 21
New Features : - Tempo button now works on Cuelist set to 'chase'
- Set universe number for Artnet (Options->Hardware)
Solved Bugs : - 'Square' shape icon was missing in Windows release
- Change the order of the cues within cuelist didn't work
- Bank safe function did not undo properly
- bug in USB communication on Windows
- clicking on gobo2 or gobo3 belt did not activate control
- 1024 x 768 resolution was incorrect
Limitations : - USB communication on Mac OS X
- cuelist tempo divider doesn't work yet

/*****
* RELEASE 0.21 Build 4 Beta
*****/

Release Date : 2009 March 31
New Features : - Spanish language
- French language
- iPhone remote control
Solved Bugs : - renaming Fixture did reflect in Group or Cuelist
- renaming Cuelist did reflect in Playback
- fixture icons in main view were displayed too late
- bug in USB communications
Limitations : - Tempo button
- disk menu can crash under windows

/*****
* RELEASE 0.18 Build 1 Beta
*****/

Release Date : 2009 March 20
New Features : - Midimaps for Korg Nano Pad and Korg Nano Kontrol
Solved Bugs : - Record on a playback did not refresh the playback content properly
Limitations : - Tempo button
- disk menu can crash under windows

/*****
* RELEASE 0.17 Build 1 Beta
*****/

Release Date : 2009 March 19
New Features : - 'Delete' button for directly removing cues from playbacks
- Square and Random shapes
- Chase mode for cuelists
- Gridview improved
Solved Bugs : - MIDI communication on Mac OS
Limitations : - Tempo button
- disk menu can crash under windows
