

CAPTURE VISUALISATION

Specification Sheet

CAPTURE VISUALISATION is a lighting design software using 3D studio graphics. Unlike other Cad based design Software's, you don't need to learn Cad. Capture is a drag and drop and easy to learn software. Simply find your fixture or object, drag it into the workspace and modify to your specifications. Easily place objects with X Y Z views.

2D designs and Plots.

Create your Stage or venue layouts and lighting Plots, create fixture patch using real life fixture modes. Transfer patch over to lighting consoles using CIP.

3D Visualizer

Bring your design to life with Captures latest real texture 3D engine. The beauty of Capture is how fast it renders to 3D. Where other software's can take 10-30 minutes to Render, Capture converts to LIVE view in seconds. Capture libraries use photometric data to show difference in light outputs.

Export Presentations!

Export and share your work with a sharable executable file that others can open see and connect to a console to program.

IOS App

Go mobile and load your presentation file to the Capture App for iPhone or iPad.

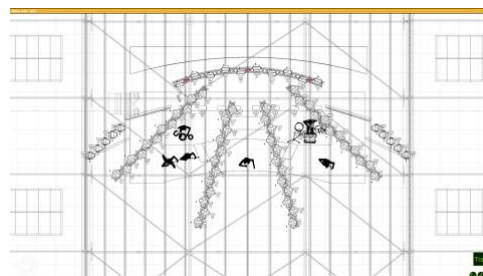

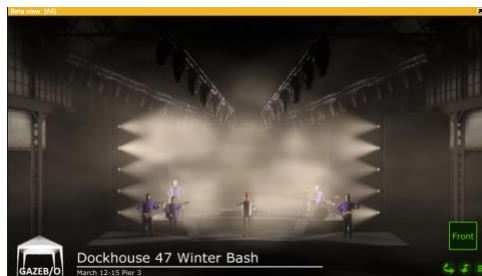

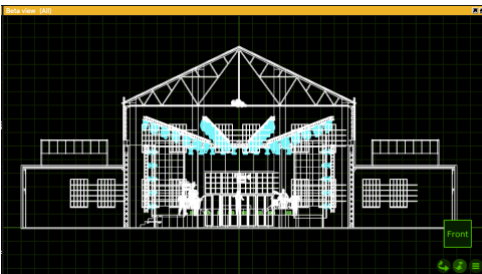

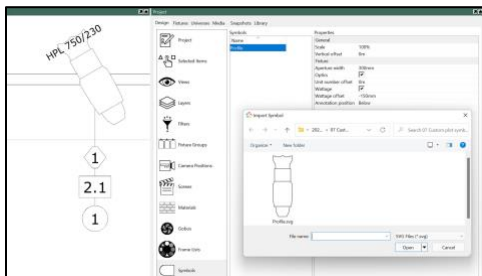

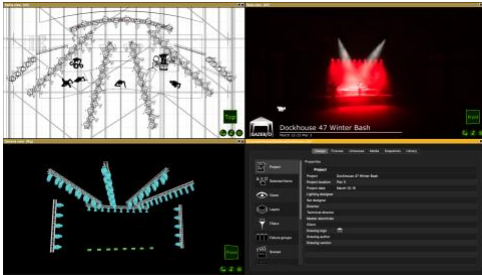

Editions

There are 4 Editions available to get started with Capture. All editions unlock key features and allow you to save your work. You can start with smaller editions and upgrade when needed to own the Full Version of Capture.

Licensing & Versions

Capture does not have a yearly subscription, when you buy a Capture license it belongs to you for as long as your computer supports it.

Capture releases a **new version of Capture software every year** that takes advantage of the power provided from newer computing power. Newer Version upgrades are available for purchase at a reduced price.

Lighting design software

Save time with a lighting design, documentation and visualisation software that is both easy to learn and rewarding to use! Capture is a native macOS and Windows application that lets you work with lighting, video, laser, moving scenery and water effects. Where Capture truly excels is with its ease

of use and seamless switching between design, documentation and visualisation. This provides an unprecedented level of flexibility and ability to support different types of design processes. It encourages you to try out new workflows and find faster ways of working.

Design

Whether you're looking to create a simple 2D sketch or a full-blown 3D plot, Capture has you covered. Try as many different fixtures, hanging positions and accessories as you need.
