GENERAL INFORMATION

INTRODUCTION

Please read and understand the instructions in this manual carefully and thoroughly before attempting to operate this device. These instructions contain important safety and use information. **This device is intended for professional use only.**

UNPACKING

Every device has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton is damaged, carefully inspect the device for damage, and be sure all accessories necessary to install and operate the device have arrived intact. In the event damage has been found or parts are missing, please contact our customer support team for further instructions. Please do not return this device to your dealer without first contacting customer support. Please do not discard the shipping carton in the trash. Please recycle whenever possible.

BOX CONTENTS

Barndoor Assembly (x1)
Junior Pin (x1)
Power Cable (x1)
Barndoor Safety Cable (x1)

LIMITED WARRANTY

For up-to-date warranty information regarding your device, please visit Elation's warranty information page online or scan the QR codes below.

USA: <https://www.elationlighting.com/warranty-information>

EU: https://www.elationlighting.eu/terms_and_conditions

THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF, AS DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS FIXTURE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURER'S WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.

SAFETY GUIDELINES

This fixture is a sophisticated piece of electronic equipment. To guarantee smooth operation, it is important to follow all instructions and guidelines in this manual. Elation Professional is not responsible for injury and/or damages resulting from the misuse of this fixture due to the disregard of the information printed in this manual. Only qualified and/or certified personnel should perform installation of this fixture and only the original rigging parts included with this fixture should be used for installation. Any modifications to the fixture and/or the included mounting hardware will void the original manufacturer's warranty and increase the risk of damage and/or personal injury.

PROTECTION CLASS 1 - FIXTURE MUST BE PROPERLY GROUNDED.

THERE ARE NO USER SERVICEABLE PARTS INSIDE THIS UNIT. DO NOT ATTEMPT ANY REPAIRS YOURSELF. DOING SO WILL VOID YOUR MANUFACTURER'S WARRANTY. DAMAGES RESULTING FROM MODIFICATIONS TO THIS DEVICE AND/OR THE DISREGARD OF SAFETY INSTRUCTIONS AND GUIDELINES IN THIS MANUAL VOID THE MANUFACTURER'S WARRANTY AND ARE NOT SUBJECT TO ANY WARRANTY CLAIMS AND/OR REPAIRS.

**DO NOT PLUG THIS UNIT INTO A DIMMER PACK!
NEVER OPERATE THIS UNIT WITH THE CASING REMOVED!
DISCONNECT POWER BEFORE PERFORMING MAINTENANCE!
NEVER TOUCH DURING OPERATION, AS FIXTURE SURFACES MAY BE HOT!
KEEP FLAMMABLE MATERIALS AWAY FROM FIXTURE!**

**NEVER LOOK DIRECTLY INTO THE LIGHT SOURCE!
RETINA INJURY RISK - MAY INDUCE BLINDNESS!
SENSITIVE PERSONS MAY SUFFER AN EPILEPTIC SHOCK!**

**FOR USE IN INDOOR OR DRY LOCATIONS ONLY!
DO NOT EXPOSE TO RAIN AND/OR MOISTURE!**

SAFETY GUIDELINES

- **DO NOT TOUCH** the fixture housing during operation.
- Turn OFF the power and allow approximately 15 minutes for the fixture to cool down before serving.
- **DO NOT** shake fixture and avoid brute force when installing and/or operating fixture.
- **DO NOT** operate fixture if the power cord is frayed, crimped, damaged, and/or if any of the power cord connectors are damaged and do not insert into the fixture securely with ease.
- **NEVER** force a power cord connector into the fixture. If the power cord or any of its connectors are damaged, replace it immediately with a new one of the same rating.
- **DO NOT** block any air ventilation slots.
- All fan and air inlets must remain clean and never blocked.
- Allow approx. 6" (15cm) between fixture and other devices or a wall for proper cooling.
- When installing fixture in a suspended environment, always use mounting hardware that is no less than M10 x 25 mm, and always install fixture with an appropriately rated safety cable.
- Always disconnect fixture from main power source before performing any type of service and/or cleaning procedure.
- Only handle the power cord by the plug end, and never pull out the plug by tugging the wire portion of the cord.
- During the initial operation of this fixture, a light smoke or smell may emit from the interior of the fixture. This is a normal process and is caused by excess paint in the interior of the casing burning off from the heat associated with the lamp and will decrease gradually over time.
- Consistent operational breaks will ensure fixture will function properly for many years.
- **ONLY** use the original packaging and materials to transport the fixture for service.

MAINTENANCE GUIDELINES

DISCONNECT POWER BEFORE PERFORMING ANY MAINTENANCE!

CLEANING

Frequent cleaning is recommended to ensure proper function, optimized light output, and an extended life. The frequency of cleaning depends on the environment in which the fixture operates: damp, smoky, or particularly dirty environments can cause greater accumulation of dirt on the fixture's optics. Clean periodically with a soft cloth to avoid dirt/debris accumulation.

NEVER use alcohol, solvents, or ammonia-based cleaners.

MAINTENANCE

Regular inspections are recommended to ensure proper function and extended life. There are no user serviceable parts inside this fixture. Please refer all service issues to an authorized Elation service technician. Should you need any spare parts, please order genuine parts from an authorized Elation dealer.

Please refer to the following points during routine inspections:

- A detailed electrical check by an approved electrical engineer every three months, to make sure the circuit contacts are in good condition and prevent overheating.
- Be sure all screws and fasteners are securely tightened at all times. Loose screws may fall out during normal operation, resulting in damage or injury as larger parts could fall.
- Check for any deformations on the housing, color lenses, rigging hardware, and rigging points (ceiling, suspension, trussing). Deformations in the housing could allow for dust to enter into the fixture. Damaged rigging points or unsecured rigging could cause the fixture to fall and seriously injure a person(s).
- Electric power supply cables must not show any damage, material fatigue, or sediments.

NEVER remove the ground prong from the power cable.

FIXTURE OVERVIEW

INSTALLATION INSTRUCTIONS

FLAMMABLE MATERIAL WARNING

Keep fixture minimum 5.0 feet (1.5m) away from flammable materials and/or pyrotechnics.

ELECTRICAL CONNECTIONS

A qualified electrician should be used for all electrical connections and/or installations.

DO NOT PERFORM THE INSTALLATION YOURSELF IF YOU ARE NOT QUALIFIED TO DO SO!

WHEN RUNNING ON 110V POWER, THE UNITS MAY NOT BE LINKED TOGETHER VIA THE POWER INPUT/OUTPUT TERMINALS! EACH UNIT MUST BE INDEPENDENTLY CONNECTED TO A POWER SOURCE!

When running on 240V power, however, up to 4 units may be linked together via the power input/output terminals. Once this value has been reached, a new power outlet must be used to accommodate additional units. All linked units **MUST** be of the same make and model type. **DO NOT MIX UNITS!**

Fixture **MUST** be installed following all local, national, and country commercial electrical and construction codes and regulations.

Before rigging/mounting a single fixture or multiple fixtures to any metal truss/structure or placing the fixture(s) on any surface, a professional equipment installer **MUST** be consulted to determine if the metal truss/structure or surface is properly certified to safely hold the combined weight of the fixture(s), clamps, cables, and accessories.

Maximum fixture ambient operating temperature is **113°F (45°C)**. Do not operate this fixture when ambient temperature exceeds this rating.

Fixture(s) should be installed in areas outside walking paths, seating areas, or away from areas where unauthorized personnel might reach the fixture by hand.

NEVER stand directly below the fixture(s) when rigging, removing, or servicing.

Overhead fixture installation must always be secured with a secondary safety attachment, such as an appropriately rated safety cable.

Allow approximately 15 minutes for the fixture to cool down before serving.

FIXTURE INSTALLATION

CLAMP INSTALLATION

A junior pin can be attached to the mounting surface on the fixture's mounting yoke, and this junior pin can then be used as an attachment point for a mounting clamp. Details on junior pin installation can be found in the **Accessory Installation** section of this manual.

The device also features a safety cable loop on mounting yoke hinge nearest to the DMX ports (see the illustration below for reference). When mounting the fixture to a truss or any other suspended or overhead installation, be sure to secure an appropriately rated clamp (not included) to the junior pin and attach a separate **SAFETY CABLE** of the appropriate safety rating to the safety cable rigging point. In the event that the optional barn doors are installed on this fixture, a secondary SAFETY CABLE is also required to be attached to the barn doors, as shown in the image below. For information on barn door installation, please refer to the **Accessory Installation** section of this manual.

ALWAYS ATTACH A SAFETY CABLE WHENEVER INSTALLING THIS FIXTURE IN A SUSPENDED ENVIRONMENT TO ENSURE THAT THE FIXTURE WILL NOT FALL IF THE CLAMP FAILS.

RIGGING

Overhead rigging requires extensive experience, including but not limited to: calculating working load limits, understanding the installation material being used, and periodic safety inspection of all installation material and the fixture itself. If you lack these qualifications, do not attempt to perform the installation yourself. Improper installation can result in bodily injury.

ACCESSORY INSTALLATION

JUNIOR PIN INSTALLATION

To install the junior pin to the mounting point on the yoke, orient the junior pin with the notched end facing the yoke mounting point. Align the notch on the junior pin with the matching groove on the yoke mounting point. Then, insert the fastener from the other side of the yoke mounting point, making sure that the fastener goes through both the yoke and the junior pin, and tighten the fastener securely. The junior pin should now be securely installed.

See the picture below for reference:

ACCESSORY INSTALLATION

STAND MOUNT INSTALLATION

This device is capable of being stand mounted by following the steps below:

1. Install the Junior Pin, as detailed elsewhere in this section.
2. Lock the mounting bracket in place by tightening both bracket knobs.
3. Insert the Junior Pin into the top of the Tripod Stand. Align the through-hole on the Junior Pin with the holes in the top of the Tripod Stand, then insert the Locking Pin through the hole and fasten in place.
4. If necessary, loosen the bracket knobs, adjust the fixture to the desired position, then tighten the bracket knobs to lock the fixture in place. Use caution to prevent the Tripod Stand from tipping over during adjustment.

See the picture below for reference:

ACCESSORY INSTALLATION

BARN DOOR INSTALLATION

1. Unlock both frame lock tabs using the latches located on each tab (circled in the image below). Flip the top edge of the frame upward.

2. Look beneath the frame lock tabs and locate the installation slots on the inner edge of the frame. The slot closest to the front of the device should be vacant. Carefully slide the barndoor into this slot, then flip down the top edge of the frame and lock the frame lock tabs back in place.

3. With the barndoors locked securely in place, pull on the tabs at the edges of the barndoor flaps to deploy the barndoors. Installation is now complete. **Please note that the barn-door accessory must be installed with its own safety cable! Refer to the diagram in the Fixture Installation section of this manual.**

ACCESSORY INSTALLATION

INTENSIFIER LENS INSTALLATION

1. Unlock both frame lock tabs using the latches located on each tab (circled in the image below). Flip the top edge of the frame upward. Slide the standard lens upward out of its slot.

2. Slide the Intensifier Lens into the slot. **Please note that the Intensifier Lens is NOT reversible. The forward-facing side of the Intensifier Lens should have a slight ridge in the lens frame, while the rearward-facing side should have a smooth lens frame.**

3. Flip the top edge of the fixture frame back down into place, and lock the frame tabs back into place. The installation is now complete.

BATTERY CONNECTION

This device is capable of receiving power from a battery pack.

NOTICE: The user is responsible for ensuring compatibility between the device and the battery pack. Always ensure that the output specifications, operating conditions, and connection pinouts of the battery pack match the device requirements.

The device features a 4-pin XLR connector for battery power. The connector is located on the back of the device, next to the DMX In/Out connectors, and is covered with a dust cap. **BE CAREFUL NOT TO CONNECT BATTERY POWER TO ONE OF THE DMX CONNECTORS BY MISTAKE!** The pinout is illustrated below:

Pin	Assignment
1	GND
2	
3	+24-36V DC
4	

Consult the **Safety Guidelines** section of this user manual, as well as any safety instructions included with your battery pack before use or installation.

The device consumes up to 544W when operating all LEDs at full output, which may require significant battery output to provide the required power. To extend the battery life, it is possible to reduce the LED power by up to to 50% of maximum output using the “LED Power Limit” menu in the Personality section of the system menu. Please refer to the **System Menu** section of this manual for detailed information.

SYSTEM MENU

The fixture includes an easy to navigate system menu. The control panel (see image below) located on the back of the fixture provides access to the main system menu, where all necessary system adjustments are made. During normal operation, pressing the MODE button once will access the fixture's main menu. Once in the main menu, you can navigate through the different functions and access the sub-menus with the UP and DOWN buttons. Once you reach a field that requires adjusting, press the ENTER button to activate that field and use the UP and DOWN buttons to adjust the field. Pressing the ENTER button once more will confirm your setting. You may exit the main menu at any time without making any adjustments by pressing the MODE button.

The display screen can be locked by selecting **PERSONALITY > DISPLAY > SCREEN LOCK**. To unlock the display screen, simply press and hold the MODE button for three (3) seconds.

SOFTWARE UPDATES

ONLY QUALIFIED TECHNICIANS SHOULD PERFORM THIS FUNCTION!

NOTE ALL MENU SETTINGS BEFORE UPDATING SOFTWARE!

FIXTURE SOFTWARE CAN NOT BE DOWNGRADED!

DOWNLOAD FIXTURE SOFTWARE TO PC ONLY! (NO MAC SUPPORT)

PLEASE CONTACT ELATION SERVICE FOR FURTHER INFORMATION.

PERSONALITY – Service Setting – USB Update

To update the fixture software via the UPDATE/SERVICE PORT, follow steps below.

1. Copy fixture software update file from a PC computer to a compatible USB flash drive. Make sure only the fixture software update file is stored on the USB flash drive.
2. Disconnect DMX and E-FLY connections and power the fixture ON.
3. Insert USB flash drive into the UPDATE/SERVICE PORT on the rear connection panel.
4. In the main system menu, navigate to Personality > Service, key in the passcode, and press ENTER.
5. Select the Update Software option, then scroll to YES and press ENTER.
6. Select the software file name on the menu display and press ENTER.
7. Select YES to begin update process and Updating...% will show on the menu display.
8. After file is uploaded, the fixture will check the software which will take some time.
9. The fixture will perform a reset process when the software update process is complete.
10. Remove the USB flash drive and make necessary system menu setting adjustments.

SPECIFICATIONS

SOURCE

6-in-1 (Red, Green, Blue, White, Lime, Cyan) Full Spectrum LED Array

50,000 Hour Average LED Life*

*Test lab conditions. May vary depending on several factors including but not limited to:
Environmental Conditions, Power/Voltage, Usage Patterns (On-Off Cycling), Control, and Dimming.

PHOTOMETRIC DATA

Up to 44,000 Total Lumen Output

Diffuser

- Beam Angle 101°
- Field Angle 159.4°

Without Diffuser

- Beam Angle 111°
- Field Angle 155.4°

EFFECTS

Variable CCT 2,000K - 10,000K

Green-Shift Adjustment

4x2 Section Control

Virtual Gel Library

Variable 16-bit Dimming Curve Modes

High Speed Electronic Shutter and Strobe

Remote Adjustable LED Refresh Rate Frequency (900-25kHz)

CONTROL / CONNECTIONS

12 DMX Channel Modes (1-96 Ch.)

1 or 8 cell control sections

3 Manual Adjustment Encoders

4 Button Control Panel and OLED Menu Display

E-FLY™ Internal Extended Range Wireless DMX Transceiver

Locking 5pin XLR Connector In/Out

Locking 3pin XLR Connector In/Out

Locking IP65 Power Connector In/Out

USB Connection (Firmware Updates, External 5V power for accessories)

4pin XLR External Battery Connection (battery not included)

SIZE / WEIGHT

Length: 33.8" (858.0mm)

Width: 6.1" (155.5mm)

Height: 12.1" (306.3mm)

Height (with yoke): 16.8" (426.8mm)

Weight: 37.9 lbs. (17.2 kg)

Weight: (Junior Pin) 1.02 lbs. (0.46 kg)

ELECTRICAL / THERMAL

AC 100-240V - 50/60Hz

24-36 VDC (battery operation - battery not included)

Max Power Consumption 544W

14°F to 113°F (-10°C to 45°C)

BTU/hr (+/- 10%) 1708.2

APPROVALS / RATINGS

CE | cETLus | IP20 | UKCA

FCC STATEMENT

FCC RADIO FREQUENCY INTERFERENCE WARNINGS & INSTRUCTIONS

Please note that changes or modifications of this product is not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- **NOTE:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
